CitiCode	MVOM

\*This includes a standard 1% product charge, a fixed management fee and expenses that vary with the day to day costs of running the fund. Expenses can include costs paid by Aegon to third parties. You may pay a different product charge.

## About fund performance

Investors should always consider performance in relation to the objective of the fund and over periods of at least five years. If a fund has risen in value, it doesn't mean it is meeting its objective – especially if the fund is aiming to outperform a particular benchmark or meet a risk target. The same applies if the fund has fallen in value.

## Our risk rating

**Below-average risk**

Below average risk funds will generally see some change in day-to-day value, both up and down, and these changes will typically be larger than those of a cash deposit. They may hold a broad range of investment types, including equities (shares), but a significant proportion may also be invested in investments that aim to provide a reliable source of income (like government and corporate bonds) and, with that, greater stability than would typically be available from equities. They try to provide better long-term growth prospects than a cash deposit, but are lower risk than funds investing largely in equities.

## Responsible Investment

We've committed to transitioning all our default funds, including this one, to net-zero greenhouse gas emissions by 2050. This fund will exclude or include investments based on responsible investment criteria. As investors move towards their target retirement date, the amount invested in these types of holdings will change as a part of that process. You can read more about this in the fund objective.

## Fund objective

This fund is aimed at those who want to keep their options open at retirement. It uses a two-stage investment process. In the early years (the growth stage) it aims to grow savings over the long term by investing in an equal mix of global equities (company shares) and UK bonds (a blend of UK corporate, UK index-linked and conventional government bonds). It's designed to track the markets it invests in, so performance should be similar to those markets. In the six years before your target retirement year (the flexible target stage), we'll progressively move you into less risky investments. We'll also move part of your investment into cash in the final two years to cater for your maximum tax-free cash entitlement, currently 25% of your pension pot. We review our workplace target funds regularly and may change them if we believe it's in the best interests of investors.

## Fund performance

The following graph and tables show the performance of the fund over various time periods compared to the fund's benchmark (if there is one). All performance information is as at 31 Dec 2025 unless otherwise stated.

In the graph, performance is shown since launch if the fund is less than five years old.

## Underlying fund

### Fund mgmt group

Aegon/Scottish Equitable plc

### Fund manager information

This fund is an Aegon Solution. This means it is a pre-built fund Aegon have created to offer whole investment strategies in a single fund with the aim of making investing easier. We reserve the right to add, remove and replace the underlying funds within this solution with the aim of making sure the fund continues to meet its aims and objectives. Sometimes we work with external fund managers and they select and manage the underlying funds on our behalf. The additional charges/expenses may change when underlying funds are replaced, added or removed from the portfolio or when weightings between the underlying funds are changed. Please note, there's no guarantee the fund will meet its objective.

## Risks specific to this fund

There is no guarantee the fund will meet its objective. The value of an investment can fall as well as rise and investors could get back less than they originally invested. All funds carry a level of risk and the information below outlines the key risks for this fund.

---

**Currency risk** - this fund invests overseas so its value will go up and down in line with changes in currency exchange rates. This could be good for the fund or bad, particularly if exchange rates are volatile.

---

**Flexible target risk** - this strategy aims to reduce the risk your fund is exposed to as you near retirement by moving into lower risk investments. By de-risking, there's a chance you may end up worse off than if you'd stayed in the growth fund.

---

**Post retirement risk (Flexible target)** - although this fund aims to reduce risk as you approach retirement, it will still have a significant proportion invested in riskier investments like equities on your selected retirement date, so there's still a risk it may fall in value.

---

**Third party risk** - in the event that the underlying investments which the fund invests in suspend trading, Aegon may defer trading and/or payment to investors. The value ultimately payable will depend on the amount Aegon receives or expects to receive from the underlying investments.

---

**Credit risk** - this fund invests in bonds or other types of debt. Bonds are essentially loans to companies, governments or local authorities so there's a risk that these companies or government bodies may default on the loan. Bonds are rated in terms of quality, usually from AAA down to B and below. AAA is the highest quality and therefore the least likely to default and B or lower the most likely to default. Where we have it we show the credit quality of the loans held by this fund.

---

**Interest rate risk** - interest rate changes could affect the value of bond investments. Where long term interest rates rise, the value of bonds is likely to fall, and vice versa.

---

**Lifestyle performance information** - this factsheet contains information and performance for the 'Growth stage' of the lifestyle fund. The information and performance for your fund will be different if you're within the 'Retirement target/Lifestyle stage'. That stage normally starts between 15 and 7 years before your selected retirement date, depending on the lifestyle fund you're invested in.

---

**Benchmark disclaimer** - the Aegon Balanced Tracker (Flexible Target) fund is/are not in any way sponsored, endorsed, sold or promoted by FTSE International Limited ("FTSE") or the London Stock Exchange Group companies ("LSEG") (together the "Licensor Parties") and none of the Licensor Parties make any claim, prediction, warranty or representation whatsoever, expressly or impliedly, either as to (i) the results to be obtained from the use of the Composite Index (the "Index") (upon which the Aegon Balanced Tracker (Flexible Target) fund is based), (ii) the figure at which the Index is said to stand at any particular time on any particular day or otherwise, or (iii) the suitability of the Index for the purpose to which it is being put in connection with the Aegon Balanced Tracker (Flexible Target) fund.

None of the Licensor Parties have provided or will provide any financial or investment advice or recommendation in relation to the Index to Scottish Equitable plc. or to its clients. The Index is calculated by FTSE or its agent. None of the Licensor Parties shall be (a) liable (whether in negligence or otherwise) to any person for any error in the Index or (b) under any obligation to advise any person of any error therein.

All rights in the Index vest in FTSE. "FTSE®" is a trade mark of LSEG and is used by FTSE under licence.
