This document is intended for use by individuals who are familiar with investment terminology. Please contact your financial adviser if you need an explanation of the terms used.

The SL Sustainable Index UK Equity Pension Fund invests primarily in the PUTM ACS Sustainable Index UK Equity Fund. The aim of the PUTM ACS Sustainable Index UK Equity Fund is summarised below.

The fund aims to provide a total return (a combination of capital growth and income), delivering an overall return in line with the FTSE 350 ex IT Phoenix Climate Aligned Index (the "Index"), before management fees and expenses.

The fund aims to achieve its investment objectives, including the sustainability objective, by investing at least 90% of the portfolio in large or midcap equities and equity related securities of companies in the UK market that are constituents of the Index in approximate proportion to their weightings in the Index. The fund may also invest in other transferable securities, money-market instruments, deposits, cash and near cash and other collective investment schemes. Derivatives will be used for efficient portfolio management only.

The value of any investment can fall as well as rise and is not guaranteed – you may get back less than was paid in.  
The sterling value of overseas assets held in the fund may rise and fall as a result of exchange rate fluctuations.

**Note(s):** The information shown relates to the past. Past performance is not a guide to the future. The value of your investment can go down as well as up. For the relevant charges on your policy please refer to your policy documentation.

Where a fund holds overseas assets the Sterling value of these assets may rise and fall as a result of exchange rate fluctuations.

**Definition(s):** Volatility Rating - The volatility rating of a fund indicates how much the fund price might move compared to other funds. The higher the volatility rating, the less stable the fund price is likely to be. You can use this to help you decide how much risk you're comfortable taking with your investments. Volatility ratings are calculated on a scale of 0-7.

Money Market - may include bank and building society deposits, other money market instruments such as Certificates of Deposits (CDs), Floating Rate Notes (FRNs) including Asset Backed Securities (ABSs), Money Market Funds and allowances for tax, dividends and interest due if appropriate.

## Key Risks

The fund can invest in a wide variety of investment strategies and assets. Below we document the specific or heightened risks applicable to this fund rather than an exhaustive list.

**CIS Risk-** The fund can invest in collective investment schemes which can themselves invest in a diverse range of other assets. These underlying assets may vary from time to time but each category of asset (which may include equities, bonds or immoveable property) has individual risks associated with them. The fund may not have any control over the activities of any collective investment scheme invested in by the fund.

**Equities Risk-** This fund can invest in equities which are one of the more volatile asset classes and can therefore suffer sudden sharp falls or rises. Equities can offer good growth potential over the longer term but may have a higher volatility than other asset classes.

**ESG Risk -** The Fund seeks to exclude companies engaging in certain activities inconsistent with ESG criteria. Investors should therefore make a personal ethical assessment of the Fund's ESG screening prior to investing in the Fund. Such ESG screening may adversely affect the value of the Fund's investments compared to a fund without such screening.
