Asset Allocation (as at 31/10/2021)

This document is provided for the purpose of information only. This factsheet is intended for individuals who are familiar with investment terminology. Please contact your financial adviser if you need an explanation of the terms used. This material should not be relied upon as sufficient information to support an investment decision. The portfolio data on this factsheet is updated on a quarterly basis.

Sector Breakdown (as at 31/10/2021)

Fund Aim

The fund invests via the Halifax UK Equity Income OEIC Fund. The UK Equity Income OEIC Fund aim is: To provide above average income, along with potential long term capital growth by investing predominantly in a portfolio of companies which are part of the FTSE All Share Index (the "Index"). The Fund seeks to deliver performance, before deduction of management fees, in excess of the Index with a similar level of overall volatility, over the long term. Companies will be selected which have the potential to provide higher than average dividend yields and to achieve long term capital growth. The Fund seeks to hold more in these companies in comparison to the Index. Therefore, while the Fund will invest in a large number of companies in common with the Index, the amount held in any one company may be significantly different to the Index. The Fund is limited in the extent to which it can hold more (overweight) or less (underweight) in sectors relative to the Index, but it aims to hold more in sectors which are expected to provide a higher than average dividend yield.

Quarterly Fund Manager Review

UK equities rose over Q3 with the market driven by a variety of factors. While there were some clear sector winners (such as energy on the back of a recovery in crude oil prices) the difference between the best and worst-performing stocks, or dispersion, was quite marked. Within consumer staples, for instance, some of the more highly valued consumer goods companies performed poorly, while the more lowly valued grocery retailers performed well. Merger & acquisition (M&A) activity remained an important theme. The period began with a recommended counter-offer for Wm Morrison Supermarkets and bid activity was seen across a variety of areas. Gaming remained an area of interest, with a proposal from US sports betting group DraftKings to acquire Entain. Within industrials there was headline-grabbing bid for aerospace and defence equipment supplier Meggitt. This in part explains the positive contribution from the consumer discretionary and industrial sectors, with the latter also helped by the easing of transatlantic travel restrictions and dollar strength against some weakness in sterling. Small and mid cap (SMID) equities suffered in line with higher growth areas of the market more generally in September but performed very well over the quarter a whole. SMID caps remained a sweet spot for M&A activity and made a useful contribution to overall market returns. The Bank of England took a more hawkish tone as inflationary pressures continued to surpass expectations. Business surveys confirmed that supply bottlenecks are constraining output. Natural gas and fuel shortages made headlines towards the period end. These developments were also reflected in higher market interest rates, which helped support financials. However, Asian focused banks were lower in the period given the growing uncertainty around the outlook for Chinese markets and the economy.
