Pension Fund

Clerical Medical Ethical

Fund Aim

The Fund invests via the HBOS Ethical OEIC Fund. The HBOS Ethical OEIC Fund aim is: To achieve capital growth by investing in companies whose activities are considered ethical, both in terms of their primary activities as well as in the means of achieving them. At least 80% of the Fund will invest in global shares, including emerging markets. The Investment Adviser will select companies on the basis of a broad range of ethical and socially responsible criteria. These criteria include the environment, employee relations, product quality and business practices. The Fund is actively managed by the Investment Adviser who selects investments with the aim of outperforming the Index by 2% per annum on a rolling 3 year basis, before deduction of fees. The Investment Adviser is limited in the extent to which positions can vary to those of the Index. The limits help to provide a balance between the spread of assets within the Fund and risk management. They also provide a balance between the amount the Fund can vary from the Index and provides the Investment Adviser with flexibility to seek to outperform the Index. As a result, the Fund's performance may differ substantially from the Index.

'ESG Metrics'

This document is provided for the purpose of information only. This factsheet is intended for individuals who are familiar with investment terminology. Please contact your financial adviser if you need an explanation of the terms used. This material should not be relied upon as sufficient information to support an investment decision. The portfolio data on this factsheet is updated on a quarterly basis.

Information Statement

Clerical Medical produce Environmental, Social and Governance themed fund metrics. Selected data can be found using the ESG metric link.

Performance figures are in £ Sterling on a single pricing basis, with income (where applicable) reinvested net of UK tax and net of total annual fund charges. These figures do not include any initial charge or other product charge(s) that may be applicable.

Quarterly Fund Manager Review

The Portfolio returned 7.36% in Q4, outperforming the benchmark index by 99bps. From a sector viewpoint, the largest contributions to relative returns came from having no Energy exposure, being overweight Information Technology and stock selection in Information Technology and Communication Services. Selection in Materials and our overweight in Health Care detracted the most. From a regional perspective, selection in North America was the main driver of the excess return in the period, while selection in Japan and Europe detracted the most. Capital One Financial, ASML and Royal Caribbean Cruises contributed the most to relative returns. Capital One Financial highlighted an improving backdrop, coupled with a focus on operational efficiency, driven by investments in technology. ASML reported solid earnings, driven by demand for its lower spec DUV machines, that are not subject to restrictions, from China. The company's guidance for 2024 was modest, but it expects significant growth in 2025. Sentiment was also boosted by falling yields that benefited growth stocks. Royal Caribbean reported strong results and outlook as cruise demand continues to be robust. Panasonic, Lonza Group and Bunge detracted the most. Panasonic's results and guidance were broadly in line with expectations, but a cut to domestic automotive battery production weighed on sentiment. Lonza Group declined after the surprise departure of its CEO. In addition, a reduction in its mid-term revenue and margin guidance further impacted sentiment and the decision was taken to close the position. Bunge declined despite raising guidance for the year but concerns over potential pressure on crop prices affected sentiment.
