## Pension Fund

### Fund Aim

The fund aims to give an attractive rate of return on short term deposit instruments as well as the liquidity required in a short term investment. The fund invests in cash deposits and other forms of interest bearing money instruments where the capital is at low risk - normally in the UK.

### 'ESG Metrics'

### Asset Allocation (as at 29/12/2023)

### Maturity Breakdown (as at 29/12/2023)

The composition of asset mix and asset allocation may change at any time and exclude cash unless otherwise stated

## Clerical Medical Cash

This document is provided for the purpose of information only. This factsheet is intended for individuals who are familiar with investment terminology. Please contact your financial adviser if you need an explanation of the terms used. This material should not be relied upon as sufficient information to support an investment decision. The portfolio data on this factsheet is updated on a quarterly basis.

### Information Statement

There are controls in place to ensure the unit price of the fund cannot reduce on a daily basis. For information on how the fund has performed, see page 2 of this factsheet. This fund has relatively low potential for investment growth, so may not be suitable as a long-term investment. Clerical Medical produce Environmental, Social and Governance themed fund metrics. Selected data can be found using the ESG metric link.

Performance figures are in £ Sterling on a single pricing basis, with income (where applicable) reinvested net of UK tax and net of total annual fund charges. These figures do not include any initial charge or other product charge(s) that may be applicable.

## Quarterly Fund Manager Review

The final quarter of the year was a very positive one for fixed income markets, marking their best quarterly performance in over two decades, according to the Bloomberg Global Aggregate indices. The major driver of this performance was a perceived shift in monetary policy direction, from a "higher-for-longer" stance to prospective rate cuts. Government bond yields fell sharply, and credit markets rallied, outperforming government bonds. The US Federal Reserve (Fed) kept rates unchanged throughout the quarter, with a much clearer shift to a more dovish tone in December accelerating the market rally. Other major central banks held steady rates, although they appeared more cautious about inflation. The European Central Bank (ECB) made progress in its plan to unwind some of its Pandemic Emergency Purchase Programme support, while highlighting concerns about domestic inflation. Meanwhile, the Bank of England's Monetary Policy Committee remained divided on further tightening. The latest inflation release surprised to the downside which extended the gilt market rally. Elsewhere, the Bank of Japan's decision to make only minor adjustments to its yield curve control policy fell short of market expectations. As markets priced in easing conditions, government bond yields fell across the board. The US 10-year Treasury yield fell from 4.57% at the end of Q3 to 3.87% at the end of Q4. The UK 10-year gilt yield fell from 4.44% to 3.54%, while the German 10-year Bund yield ended the quarter 0.81% lower at 2.03%. Despite a slowing growth outlook, the corporate bond market staged an impressive rally on hopes that a deep recession could be averted as financial conditions eased. High yield markets outperformed investment grade in both the US and Europe, with a tightening of spreads also marking significant outperformance over government bonds. Meanwhile, quarterly returns in US and European investment grade credit markets have not been better since Q3 2009. The rally was broad-based across all sectors, with securitised credit, covered bonds, and quasi-government bonds all performing strongly over the quarter.
