

### Fund Aim

The Fund aims to provide capital growth by investing in a range of fixed interest securities. The Fund will include Sterling investment grade corporate and government bonds. The Fund may also invest in Sterling and non-Sterling: denominated government and supranational bonds (these are a type of security issued by two or more governmental organisations); index-linked bonds; and non-investment grade bonds. In addition the Fund may invest in non-Sterling investment grade bonds and asset backed securities such as securitised loans. The Fund may also include cash and cash like investments. Investment in the asset classes may be direct, and indirect using derivatives as an additional way for the Fund to invest with the aim of meeting the Fund's investment aim. The extent of derivative use for investment purposes is dependent on market conditions and will be limited as the intention is that this should not change the risk profile of the Fund. A proportion of the exposure to fixed interest securities may also be achieved by investing in other funds. These may be actively or passively managed. Derivatives may also be used for the purpose of managing the Fund in a way that is designed to reduce risk (for example by hedging) or cost and/or generate extra income or growth (often referred to as efficient portfolio management).

'FI and MA Fund Changes'  
 'ESG Metrics'

This document is provided for the purpose of information only. This factsheet is intended for individuals who are familiar with investment terminology. Please contact your financial adviser if you need an explanation of the terms used. This material should not be relied upon as sufficient information to support an investment decision. The portfolio data on this factsheet is updated on a quarterly basis.

### Information Statement

We've increased the range of investment options for this Fund primarily through permitting derivatives for investment purposes. We've also added more detail to explain how the Fund is invested. Please see our FI and MA Fund Changes web page for more information. Clerical Medical produce Environmental, Social and Governance themed fund metrics. Selected data can be found using the ESG metric link.

Performance figures are in £ Sterling on a single pricing basis, with income (where applicable) reinvested net of UK tax and net of total annual fund charges. These figures do not include any initial charge or other product charge(s) that may be applicable.

## Quarterly Fund Manager Review

The fixed income markets experienced considerable volatility in the last quarter of 2024, primarily driven by geopolitical tensions, central bank decisions, and fluctuating inflation rates. Notably, the period was marked by notable selloffs in major government bond markets, with various factors influencing investor sentiment across the globe. US Treasuries sold off in October amid concerns over potential inflationary policies arising from a possible Republican victory in the presidential election. The 10-year Treasury yield experienced a notable rise, finishing the year at 4.57%, indicating market uncertainty regarding the Fed's future actions amidst rising expectations for inflation if President-elect Trump were to implement all his economic policies. The European Central Bank (ECB) also cut rates over the quarter leaving the base rate at 3% at the end of the period. Political turmoil in France further complicated the landscape, as yields on French bonds briefly surpassed those of Greek bonds for the first time in history, driven by fears of government instability. The 10-year German Bund yield closed the year at 2.37% whilst the euro weakened against the dollar, reflecting the apprehensions in the market. In the UK, the Labour government's first budget at the end of October saw significant reactions in the UK fixed income market. Chancellor of the Exchequer, Rachel Reeves, announced a £40 billion tax increase and concerns over projected borrowing were also rising. Consequently, 10-year gilt yields rose, and the pound depreciated against the dollar, reflecting investor anxiety. Meanwhile, the Bank of England cut interest rates to 4.75%, although concerns over elevated inflation and wage growth dampened possibilities for further cuts in the near term. On the credit front, high yield bonds outperformed their investment-grade counterparts, driven by expectations of pro-business policies under a potential Trump administration. US high yield spreads tightened to historical lows due to strong demand. European high yield spreads also tightened over the quarter despite political pressures and economic challenges. (High yield bonds are more speculative compared to their investment grade (IG) counterparts that are the highest quality bonds as determined by a credit rating agency. HY bonds carry a credit rating below IG.)
