This document is provided for the purpose of information only. This factsheet is intended for individuals who are familiar with investment terminology. Please contact your financial adviser if you need an explanation of the terms used. This material should not be relied upon as sufficient information to support an investment decision. The portfolio data on this factsheet is updated on a quarterly basis.

Fund Objective

The Fund invests via the HBOS Ethical OEIC Fund. The HBOS Ethical OEIC Fund aim is: To achieve capital growth by investing in companies whose activities are considered ethical, both in terms of their primary activities as well as in the means of achieving them. At least 80% of the Fund will invest in global shares, including emerging markets. The Investment Adviser will select companies on the basis of a broad range of ethical and socially responsible criteria. These criteria include the environment, employee relations, product quality and business practices. The Fund is actively managed by the Investment Adviser who selects investments with the aim of outperforming the Index by 2% per annum on a rolling 3 year basis, before deduction of fees. The Investment Adviser is limited in the extent to which positions can vary to those of the Index. The limits help to provide a balance between the spread of assets within the Fund and risk management. They also provide a balance between the amount the Fund can vary from the Index and provides the Investment Adviser with flexibility to seek to outperform the Index. As a result, the Fund's performance may differ substantially from the Index.

Charges, terms and the selection of funds we make available may change. Information on the general and specific risks associated with investing in this fund is available in the relevant fund guide, or KIID where applicable. We may change the investment approach rating for the fund. All information is sourced from Scottish Widows or the relevant fund management group unless otherwise stated.

Quarterly Fund Manager Review

The Portfolio returned 1.78% in the quarter, outperforming the benchmark index by 40bps. From a sector viewpoint, the largest positive effects came from selection in the Consumer sectors and Communication Services, while selection in Industrials and Energy detracted the most. From a regional viewpoint, selection in Japan and Emerging Asia was the most successful, outweighing the detraction from selection in Latin America. ASML, Omron and Alibaba were the largest individual contributors. Our holding in the Alphabet A share class was also a significant contributor, but it was offset by not owning the C Share class. ASML raised its guidance for the year, driven by huge orders for its EUV systems. Omron reported much better-than-expected operating profits, driven by strong order growth and improving margins. Alibaba was sold early in the quarter and then fell alongside the Chinese technology giants due to the implementation of tougher regulations relating to monopolistic practices and data security. Magazine Luiza, Siemens Gamesa Renewable Energy and Ping An Insurance detracted the most. Magazine Luiza declined due to speculation of weaker-than-expected Q3 figures, driven by a deceleration of e-commerce growth, albeit against high comparative earnings the year before. Siemens Gamesa lowered its guidance for the year, due to increasing raw material prices and costs associated with its 5x platform, especially in Brazil. Ping An Insurance reported H1 earnings that missed expectations, primarily due to an impairment relating to its investment in China Fortune Land.
