

Fund Aim

The Fund invests via the Scottish Widows Unit Trust Managers UK Smaller Companies OEIC Fund. The UK Smaller Companies OEIC Fund aim is to give capital growth by investing in UK smaller companies' shares. The Fund is actively managed by the Fund Manager who chooses investments with the aim of outperforming the Numis Smaller Companies excluding Investment Trusts Index (the "Index") by 3% per annum on a rolling 3 year basis, before deduction of fees. At least 80% of the Fund will be invested in a portfolio of UK smaller company shares. The majority of these companies are those which are incorporated, or domiciled, or have a significant part of their business in the UK. The Fund will have between 40 and 90 holdings. The Fund Manager is limited in the extent to which positions can vary to those of the Index. The limits help to provide a balance between the spread of assets within the Fund and risk management. They also provide a balance between the amount the Fund can vary from the Index and providing the Fund Manager with flexibility to seek to outperform the Index. As a result, the Fund's performance may differ substantially from the Index.

Performance figures are in £ Sterling on a single pricing basis, with income (where applicable) reinvested net of UK tax and net of total annual fund charges. These figures do not include any initial charge or other product charge(s) that may be applicable.

Quarterly Fund Manager Review

UK equities rose over Q3 with the market driven by a variety of factors. While there were some clear sector winners (such as energy on the back of a recovery in crude oil prices) the difference between the best and worst-performing stocks, or dispersion, was quite marked. Within consumer staples, for instance, some of the more highly valued consumer goods companies performed poorly, while the more lowly valued grocery retailers performed well. Merger & acquisition (M&A) activity remained an important theme. The period began with a recommended counter-offer for Wm Morrison Supermarkets and bid activity was seen across a variety of areas. Gaming remained an area of interest, with a proposal from US sports betting group DraftKings to acquire Entain. Within industrials there was headline-grabbing bid for aerospace and defence equipment supplier Meggitt. This in part explains the positive contribution from the consumer discretionary and industrial sectors, with the latter also helped by the easing of transatlantic travel restrictions and dollar strength against some weakness in sterling. Small and mid cap (SMID) equities suffered in line with higher growth areas of the market more generally in September but performed very well over the quarter as a whole. SMID caps remained a sweet spot for M&A activity and made a useful contribution to overall market returns. The Bank of England took a more hawkish tone as inflationary pressures continued to surpass expectations. Business surveys confirmed that supply bottlenecks are constraining output. Natural gas and fuel shortages made headlines towards the period end. These developments were also reflected in higher market interest rates, which helped support financials. However, Asian focused banks were lower in the period given the growing uncertainty around the outlook for Chinese markets and the economy.
