Performance figures are in £ Sterling on a single pricing basis, with income (where applicable) reinvested net of UK tax and net of total annual fund charges. These figures do not include any initial charge or other product charge(s) that may be applicable.

## Quarterly Fund Manager Review

The fund returned 2.6% in the three months to 31 December 2024. The benchmark index returned 2.5% in the same period. Global equities achieved a mixed performance in the final quarter of 2024. US shares advanced following Donald's Trump's victory in the Presidential election, but other regional markets came under pressure amid worries over trade tariffs. In the US, shares made gains in Q4 to round out a strong year for the S&P 500 index. Equities were supported by not only Trump's victory in the presidential election, but also the accompanying "Red Sweep" which saw the Republicans take control of Congress. Shares were buoyed by expectations that Trump's policy programme will lift growth, lower taxes and cut regulation. Eurozone shares declined in Q4 amid fears of recession. There was political instability in France and Germany as well as worries over trade wars. UK equities also fell over the quarter. The Japanese equity market experienced gains during the fourth quarter, with the TOPIX Total Return increasing by 5.4% in yen terms. Emerging market (EM) equities and Asia ex Japan equities were both weaker in Q4 amid investor concerns about the impact of Trump's proposed tariffs, particularly on China. Fixed income markets experienced considerable volatility in Q4, primarily driven by geopolitical tensions, central bank decisions, and fluctuating inflation rates. Notably, the period was marked by notable selloffs in major government bond markets, with various factors influencing investor sentiment across the globe. US Treasuries sold off in October amid concerns over potential inflationary policies arising from a possible Republican victory in the presidential election. Yields on French bonds briefly surpassed those of Greek bonds for the first time in history, driven by fears of government instability. The 10-year German Bund yield closed the year at 2.37% whilst the euro weakened against the dollar, reflecting the apprehensions in the market. In the UK, the Labour government's first budget at the end of October saw significant reactions in the UK fixed income market. Yields on 10-year gilts rose, and the pound depreciated against the dollar, reflecting investor anxiety.
