## CM Invesco Perpetual Distribution

### Asset Allocation (as at 30/11/2021)

The composition of asset mix and asset allocation may change at any time and exclude cash unless otherwise stated

This document is provided for the purpose of information only. This factsheet is intended for individuals who are familiar with investment terminology. Please contact your financial adviser if you need an explanation of the terms used. This material should not be relied upon as sufficient information to support an investment decision. The portfolio data on this factsheet is updated on a quarterly basis.

### Fund Aim

Invesco Perpetual describe their fund's aim as follows: The fund aims to achieve a combination of income and capital growth over the medium to long term by investing primarily in corporate and government debt securities globally (which may be unrated or sub-investment grade) and equities. Financial derivative instruments can be used for investment purposes and for efficient portfolio management. Please note: The Clerical Medical unit-linked funds aim to provide long term growth in the price of the units. Any income generated will not be distributed but added to the fund value.

Performance figures are in £ Sterling on a single pricing basis, with income (where applicable) reinvested net of UK tax and net of total annual fund charges. These figures do not include any initial charge or other product charge(s) that may be applicable.

## Quarterly Fund Manager Review

The fund returned 2.0% over the quarter compared to a 0.8% gain for the Investment Association Mixed Investment 20-60% Shares Sector. This placed the fund in the first quartile of this broad and diverse peer group. The fund's equity exposure contributed the most towards performance. Gains here were supported by positive earnings results coupled with further evidence that economies are recovering strongly from the pandemic. Credit selection, led by subordinated financials and high yield bonds, were the biggest contributors from the fund's bond allocation. With bond yields rising the biggest detractor from performance was duration. During the review period we marginally increased our exposure to credit risk by adding to positions in corporate high yield. In terms of positioning the fund's largest industry exposure within the corporate bond market remains financials and within that sector the biggest allocation continues to be subordinated bank bonds. Excluding financials, our largest sector holdings are in insurance, services and industrials. As of 30 September 2021, the fund's equity exposure (including derivatives) was 39%, unchanged from the previous quarter. The fund maintains a low level of interest rate sensitivity which offered some mitigation in the rising yield environment. As of 30 September 2021, the modified duration was 2.5. Data suggests that the recovery of the global economy is continuing. Activity levels remain positive, even if they are not improving at as high a rate as earlier this year. While this environment should continue to be supportive for equities, the outlook for bond markets is more challenging in our view. Bond yields are very low and credit spreads are close to record lows. This leads us to maintain a balanced approach and as ever we are only deploying capital when we think we are being appropriately rewarded for doing so.
