Performance figures are in £ Sterling on a single pricing basis, with income (where applicable) reinvested net of UK tax and net of total annual fund charges. These figures do not include any initial charge or other product charge(s) that may be applicable.

## Quarterly Fund Manager Review

The UK equity market continued its recovery in the third quarter of the year, although the rate of UK and international economic growth showed signs of slowing down as businesses come under pressure from global supply chain disruption and staff shortages. During the third quarter of the year the FTSE All Share Index returned +2.2%, bringing the aggregate year-to-date gain (on a total return basis) to +13.6%. The fund delivered a total return of 5.0% during the quarter. The FTSE All-Share index returned 2.2%. The fund's comparator benchmark, the IA UK All Companies sector, provided an average return of 2.7%, which placed the fund in the first quartile of the peer group. The biggest sectors of outperformance came from Financials, Consumer Discretionary, Industrials and Consumer Staples with strong stock selection being the main source of positive attribution. Barclays' profits rebounded as they reported income that beat analysts' expectations and the improving economic outlook allowed them to cut provisions against loan losses. Legal and General and Burford Capital also delivered positive attribution. Next and JD Sports contributed strongly to the fund as both companies recorded strong results following increased consumer spending online and pent-up demand with people going back into shops following restrictions coming to an end in late July. Similarly, Whitbread also benefitted from the ending of restrictions as the hospitality industry opened up and Relx benefited from more in person events. The biggest area of detractor was in Healthcare. The fund's holding in Smith & Nephew PLC dragged on performance on growing sentiment that further waves of Covid might result in further delays to elective surgery for joint replacement. Barrick Gold Corporation and Newmont Corporation, companies who are linked to gold mining, were both detractors to the fund as investors rotate into growth stocks from value, on a potential higher interest rate outlook.
