Quarterly Fund Manager Review

The fund returned 0.74% over the first quarter of 2025 compared to 0.94% for the IA Sterling Corporate Bond Sector. This placed the fund in the third quartile of its peer group. The fund remains first quartile over 3 and 10-year periods. Supported by the likelihood of further interest rate reductions this year in the UK, amid fallout from US tariffs, duration was the main driver of performance. However, with spreads widening as concerns rise over a global economic downturn, credit risk had a negative impact on returns with investment grade corporate bonds the largest detractor. The biggest individual positive contributors were Legal & General, long-dated gilts (conventional and inflation-linked) and Tesco. The largest detractors were Vodafone, an inflation-linked gilt (different maturity date from above), and Thames Water.
