Performance figures are in £ Sterling on a single pricing basis, with income (where applicable) reinvested net of UK tax and net of total annual fund charges. These figures do not include any initial charge or other product charge(s) that may be applicable.

Quarterly Fund Manager Review

The fund returned 1.6% over the quarter compared to a 0.4% gain for the IA Strategic Bond Sector. This placed the fund in the first quartile of this broad and diverse peer group. Credit selection, led by subordinated financials and high yield bonds, contributed the most towards performance from the fund's bond allocation. Corporate hybrids, emerging markets and senior bank debt also made positive, albeit modest, contributions. With bond yields rising the biggest detractor from performance was duration. The fund's equity allocation contributed positively towards performance. During the review period we marginally reduced our exposure to credit risk by selling some positions in subordinated bank debt. The allocation to equities remains broadly unchanged. In terms of positioning the fund's largest industry exposure within the corporate bond market remains financials and within that sector the biggest allocation continues to be subordinated bank bonds. Excluding financials, our largest sector holdings are in food, insurance and telecoms. In addition, the fund has a 7% holding in emerging market bonds. The equity weighting is 7.8% with additional exposure gained through derivatives. The fund's credit risk and equity exposures are offset by a 20% holding in liquidity (cash, US government bonds and bonds maturing in less than a year.) This allocation helps to mitigate against periods of market volatility and means that the fund should be well placed to exploit investment opportunities when they arise. The fund maintains a low level of interest rate sensitivity which offered some mitigation in the rising yield environment. As of 30 September 2021, the modified duration was 3.1. Data suggests that the recovery of the global economy is continuing. Activity levels remain positive, even if they are not improving at as high a rate as earlier this year. While this environment should continue to be supportive for equities, the outlook for bond markets is more challenging in our view. Bond yields are very low and credit spreads are close to record lows. This leads us to maintain a balanced approach and as ever we are only deploying capital when we think we are being appropriately rewarded for doing so.
