

## What are the risks and what could I get in return? (continued)

This table shows the money you could get back over the next 5 years, under different scenarios, assuming that you invest £10,000. The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products.

The scenarios presented are an estimate of future performance based on evidence from the past and are not an exact indicator. What you get will depend on how the market performs and for how long you keep the investment.

The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

Investment £10,000				
Scenarios		1 year	3 years	5 years (Recommended holding period)
Stress scenario	What you might get back after costs	£5,250	£6,131	£5,280
	Average return each year	-47.50%	-15.05%	-11.99%
Unfavourable scenario	What you might get back after costs	£9,291	£9,974	£11,054
	Average return each year	-7.09%	-0.09%	2.02%
Moderate scenario	What you might get back after costs	£10,691	£12,714	£15,120
	Average return each year	6.91%	8.33%	8.62%
Favourable scenario	What you might get back after costs	£12,287	£16,188	£20,656
	Average return each year	22.87%	17.42%	15.61%

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your adviser or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

## What happens if Lloyds Investment Fund Managers Limited is unable to pay out?

In the event of the default of the manager or custodian of the Fund, limited protection is provided under the Collective Investment Funds (Recognized Funds) (Compensation for Investors) (Jersey) Regulations, 1988. The maximum amount of compensation payable to any one investor is £48,000, but is subject to the total amount of compensation in any one year being limited to £5,000,000.

## What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs. The amounts shown here are the cumulative costs of the product itself, for three different holding periods. The figures assume you invest £10,000. The figures are estimates and may change in the future.

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Investment £10,000			
Scenarios	If you cash in after 1 year	If you cash in after 3 years	If you cash in at 5 years
Total costs	£410	£873	£1,403
Impact on return (RIY) per year	4.14%	2.69%	2.40%

## What are the costs? (continued)

The table below shows the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period and, what the different cost categories mean.

This table shows the impact on return per year
