ISIN: IE0004777896

Date of Production 26/08/2025

What is this product?

This is one of several funds available from St. James's Place. The fund aims to preserve capital and maintain liquidity for investors seeking access to their investments. It invests in short-term money market funds which invest in high quality money market instruments issued by banks and other financial institutions.

The fund is intended for clients who are tax resident in Spain.

What are the risks and what could I get in return?

The risk indicator assumes you keep the product for 15 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

We have classified this product as 1 out of 7, which is the lowest risk class. This rates the potential losses from future performance at a very low level, and poor market conditions are very unlikely to impact our capacity to pay you.

This fund invests in cash and high quality money market instruments whose values tend to be relatively stable over time. However, the price of the fund can fall as well as rise. Key risks to understand for this fund are:

- Cash and money markets. The fund invests in cash and money market instruments. The return on these assets will be lower in periods when interest rates are low.
- Money market risk. The fund differs from an investment in deposits because the amount invested may fluctuate and is not guaranteed. Additionally, it does not rely on external support to guarantee liquidity or stabilise the value of the fund. Therefore, there is a risk that you may get back less than the amount invested.
- Derivative risk. This fund may invest in derivatives for efficient portfolio management. This is intended to reduce risk, reduce costs, or to generate additional capital or income at a low level of risk.
- Liquidity risk. In certain market conditions the fund's investments may be illiquid, meaning at times they may be difficult to buy and sell. This may cause an adverse impact on the trading price and can decrease the value of the fund.

Be aware of currency risk. You may choose to receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two countries. This risk is not considered in the indicator shown above.

This product does not include any protection from future market performance, so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment. St. James's Place International holds ring-fenced assets that match the value of your investment. This is designed to protect your investment if St. James's Place International defaults on its obligations. There is no Spanish compensation scheme for investment products.

Investment performance information

This fund holds short term fixed interest securities issued by companies and governments. The value of these investments will change according to changes in short term interest rates. The value of these investments is also sensitive to the debtor's ability to make interest and principal payments, and the general market outlook on the issuer's credit quality.

The fund is actively managed without reference to a benchmark.

What could affect my return positively?

The value of the fund's fixed interest investments may increase from an increase in short term interest rates.

What could affect my return negatively?

The value of the fund's fixed interest investments may decrease from a decrease in short term interest rates. The value of your investment is not guaranteed and under severely adverse market conditions, you could lose some or all of your initial investment.

What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs. The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early withdrawal charges. The figures assume you invest £10,000. The figures are estimates and may change in the future. The actual costs will depend on the performance of the underlying investments.

Investment £10,000			
Scenarios	If you cash in after 1 year	If you cash in after 8 years	If you cash in at 15 years
Total costs	£990	£1,865	£2,921
Impact on return (RIY) per year	9.90%	2.30%	1.85%

When you invest with us, you pay us charges for our advice and charges for the products we recommend. There is an annual charge of 2.68% a year of your total investment for the first five years of any investment and 1.18% thereafter. If you decide to cash in all or part of an investment within five years of making it, we will take an early withdrawal. The charge is a percentage of the amount cashed in and is applied on a sliding scale reducing from 7% in the first year to 1.75% in the fifth year, 0% thereafter.

In addition to the annual charges, any transaction costs and the costs of managing and maintaining the investments are charged to the fund daily, and are reflected in the prices of the fund. These costs include the fee paid to the fund manager and various other costs (such as audit fees, custody fees, VAT etc). These are also included in the total costs.

There is a bond charge, currently £3.82 (which represents 0.45% a year on an investment of £10,000) which we deduct from the value of your bond every month. This is included in the figures above.

The table below shows the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period and the meaning of the different cost categories.

This table shows the impact on return per year of each cost category over the 15-year recommended holding period.			
One-off costs	Entry costs	N/A	The impact of the costs you pay when entering your investment. This is the most you will pay, and you could pay less. This includes the costs of distribution of your products.
	Exit costs	0.00%	The impact of the costs of exiting your investment.
Ongoing costs	Portfolio transaction costs	0.00%	The impact of the costs of buying and selling underlying investments for the product.
	Other ongoing costs	1.86%	The impact of the costs that we take each year for managing your investments and providing advice. This includes our charges for advice and our charges for the product, as well as the costs of managing and maintaining the funds, such as fees paid to the external fund manager.
Incidental costs	Performance fees	N/A	There are no performance fees for this fund.
	Carried interests	N/A	There are no carried interests for this fund.
