Investment Strategy

The Fund seeks to achieve a return ahead of inflation over the long-term through investment in a range of asset classes. The Fund invests globally in a combination of assets. Predominantly these are shares and company or government bonds. Shares held will satisfy Sarasin's thematic process and generally 20-60% of the Fund's assets will be invested in shares. It is not constrained by geography, sector or style but manages risk through a variety of theme characteristics. The bonds will mainly be priced in Euros. The Fund will not track an index. Derivatives (financial instruments whose value is linked to the expected future price movements of an underlying asset) may be used only with the aim of reducing risk or costs, or generating additional capital or income.

Performance is provided net of fees. Past performance is not a reliable guide to future performance. Performance is calculated in EUR on the basis of net asset values (NAV) and gross dividends reinvested.

Source: Sarasin & Partners LLP and Financial Express. Annualised Growth Rate (AGR) is the increase or decrease in value of an investment, expressed as a percentage per year. The source for the annualised volatility measurement is Financial Express and this measurement is expressed using the standard deviation of the Fund's Euro monthly returns over the most recent 36 month period. The benchmark of this fund has changed over time. Please visit www.sarasinandpartners.com/docs/global/benchmarkhistory for a full history.
