Expenses can include costs paid by Aegon to third parties. The fund charges may differ for Retiready (RR) or Aegon One Retirement (AOR).

About fund performance

Investors should always consider performance in relation to the objective of the fund and over periods of at least five years. If a fund has risen in value, it doesn't mean it is meeting its objective - especially if the fund is aiming to outperform a particular benchmark or meet a risk target. The same applies if the fund has fallen in value.

Our risk rating

Higher risk

Higher risk funds typically invest in regions and investment types that can experience large day-to-day changes in value, both negative and positive. They tend to invest in a single investment type or geographical region and these investment types (for example funds investing in commodity companies) and regions (for example emerging markets equities) have historically been more volatile (risky) than those in the 'Above-average risk' category. These funds have historically provided periods of positive returns but, because of their narrow investment focus, they're better suited to investors with at least five years to invest and to use in combination with other funds as part of a diversified portfolio.

Fund objective

A specialist equity fund that aims to outperform the MSCI World IT Index, net of fees by investing in a global portfolio of companies from within the Index or other companies that research, design, and develop technology from any sector. The fund may have a bias towards companies listed on US stock markets. The fund will be relatively concentrated, and holdings and returns may differ materially from the Index.

Fund performance

The following graph and tables show the performance of the fund over various time periods compared to the fund's benchmark (if there is one). All performance information is as at 30 Jun 2026 unless otherwise stated.

In the graph, performance is shown since launch if the fund is less than five years old.

Source: FE fundinfo. The performance information has been calculated in pounds on a bid-to-bid basis and is net of charges with gross income reinvested. Performance for periods over a year is annualised (% per year). Past performance is not a reliable guide to future performance. The value of an investment can fall as well as rise and is not guaranteed. Investors could get back less than they invested.

Fund manager information

Aegon have created this fund to offer a single asset class solution in a single fund with the aim of making investing easier. We reserve the right to add, remove and replace the underlying funds within this solution with the aim of making sure the fund continues to meet its aims and objectives. Sometimes we work with external fund managers and they select and manage the underlying funds on our behalf. The additional charges/expenses may change when underlying funds are replaced, added or removed from the portfolio or when weightings between the underlying funds are changed. Please note, there's no guarantee the fund will meet its objective.

Risks specific to this fund

There is no guarantee the fund will meet its objective. The value of an investment can fall as well as rise and investors could get back less than they originally invested. All funds carry a level of risk and the information below outlines the key risks for this fund.

Currency risk - this fund invests overseas so its value will go up and down in line with changes in currency exchange rates. This could be good for the fund or bad, particularly if exchange rates are volatile.

Third party risk - in the event that the underlying investments which the fund invests in suspend trading, Aegon may defer trading and/or payment to investors. The value ultimately payable will depend on the amount Aegon receives or expects to receive from the underlying investments.

Investment restrictions - this fund is restricted in what it can invest in either to one country e.g. UK or to a certain type of company e.g. ethical/socially responsible, smaller or technology-based, which increases the risk to the fund if market conditions don't favour that country or type of company.

Concentration risk - this fund invests in a smaller number of stocks (company shares) than most other, similar funds. This means there's a greater chance of loss if one or more of those stocks goes down in value.

If your personal circumstances mean you need any additional support, or if you'd like a large print, Braille or audio version of this document, please visit [additional support](#) or call 0345 610 0010 8.30am – 5.30pm, Monday to Friday (call charges will vary).
