*This is on top of any product or adviser charge you pay and includes a fixed management fee plus expenses that vary with the day to day costs of running the fund. Expenses can include costs paid by Aegon to third parties. The fund charges may differ for Retiready (RR) or Aegon One Retirement (AOR).

About fund performance

Investors should always consider performance in relation to the objective of the fund and over periods of at least five years. If a fund has risen in value, it doesn't mean it is meeting its objective – especially if the fund is aiming to outperform a particular benchmark or meet a risk target. The same applies if the fund has fallen in value.

Our risk rating

Average risk

Average risk funds will generally invest in a broad range of investment types and will typically hold a significant proportion in equities (shares). Their daily price movements will therefore vary from day-to-day, both up and down, although not usually as much as for funds investing entirely in equities. These movements can lead to lengthy periods where their value goes down depending on market conditions. However, over the longer term these funds would be expected to deliver significantly better growth prospects than a cash deposit.

Responsible Investment

We've committed to transitioning all our default funds, including this one, to net-zero greenhouse gas emissions by 2050. This fund will exclude or include investments based on responsible investment criteria. As investors move towards their target retirement date, the amount invested in these types of holdings will change as a part of that process. You can read more about this in the fund objective.

Fund objective

This fund is aimed at those who intend to buy an annuity (a type of guaranteed pension) on retirement. It uses a two-stage investment process. In the early years (the growth stage) it aims to grow savings over the long term by investing mainly (generally at least 65%) in global equities (company shares) with the remainder in bonds (corporate and/or government bonds) and/or cash. It's designed to track the markets it invests in, so performance should be similar to those markets. In the six years before your target retirement year (the annuity target stage), we'll progressively move you into investments (currently long gilts and cash) with the aim of giving you more certainty about the size of annuity you'll be able to buy when you retire and to cater for your maximum tax-free cash entitlement, currently 25%. We review our workplace target funds regularly and may change them if we believe it's in the best interests of investors.

Fund performance

The following graph and tables show the performance of the fund over various time periods compared to the fund's benchmark (if there is one). All performance information is as at 31 Mar 2024 unless otherwise stated.

In the graph, performance is shown since launch if the fund is less than five years old.

Composite Index (changed from Q2 2021 reporting onwards): 20% MSCI UK All Cap / 55% MSCI ACWI ex UK / 8% BBgBarc Sterling Gilts / 2% BBgBarc UK Govt Infl Lkd Bond Float adjusted / 10% BBgBarc Sterling NonGilts / 5% JPM GBI ex UK

Source: FE fundinfo. The performance information has been calculated in pounds on a bid-to-bid basis and is net of charges with gross income reinvested. Performance for periods over a year is annualised (% per year). Past performance is not a reliable guide to future performance. The value of an investment can fall as well as rise and is not guaranteed. Investors could get back less than they invested.

Fund manager information

This fund is an Aegon Solution. This means it is a pre-built fund Aegon have created to offer whole investment strategies in a single fund with the aim of making investing easier. We reserve the right to add, remove and replace the underlying funds within this solution with the aim of making sure the fund continues to meet its aims and objectives. Sometimes we work with external fund managers and they select and manage the underlying funds on our behalf. The additional charges/expenses may change when underlying funds are replaced, added or removed from the portfolio or when weightings between the underlying funds are changed. Please note, there's no guarantee the fund will meet its objective.

Risks specific to this fund

There is no guarantee the fund will meet its objective. The value of an investment can fall as well as rise and investors could get back less than they originally invested. All funds carry a level of risk and the information below outlines the key risks for this fund.

Currency risk - this fund invests overseas so its value will go up and down in line with changes in currency exchange rates. This could be good for the fund or bad, particularly if exchange rates are volatile.

Annuity target risk - this strategy is aimed at those who want greater certainty about the size of annuity (guaranteed income) they can buy at retirement. However, by moving into long gilts and cash, you may miss out on the higher returns you might have benefited from if you'd stayed in your growth fund.

Post retirement risk (Annuity target) - if you don't buy an annuity on your retirement date, you'll remain invested 75% in long-dated bonds (government bonds only or a mix of government and corporate bonds) and 25% in cash until you tell us what you want to do. This mix isn't designed for long-term investing and returns may not keep pace with inflation, meaning the real value of your fund may fall.

Third party risk - in the event that the underlying investments which the fund invests in suspend trading, Aegon may defer trading and/or payment to investors. The value ultimately payable will depend on the amount Aegon receives or expects to receive from the underlying investments.

Credit risk - this fund invests in bonds or other types of debt. Bonds are essentially loans to companies, governments or local authorities so there's a risk that these companies or government bodies may default on the loan. Bonds are rated in terms of quality, usually from AAA down to B and below. AAA is the highest quality and therefore the least likely to default and B or lower the most likely to default. Where we have it we show the credit quality of the loans held by this fund.

Interest rate risk - interest rate changes could affect the value of bond investments. Where long term interest rates rise, the value of bonds is likely to fall, and vice versa.

Lifestyle performance information - this factsheet contains information and performance for the 'Growth stage' of the lifestyle fund. The information and performance for your fund will be different if you're within the 'Retirement target / lifestyle stage', which normally starts seven years before your selected retirement date.
