

MyNorth Index High Growth

Monthly Update for 30 April 2026

Description

The Fund offers investors a passively managed and diversified exposure to a variety of asset classes including shares, property, fixed interest and cash. Investments are also spread across both in Australian and overseas markets. Growth assets for the MyNorth Index High Growth Fund (such as shares and property) will have an average allocation of 97% with the difference in defensive assets. Securities in the underlying asset classes will be managed to track the nominated index of that asset class.

Investment Objective

The Fund aims to track the return of the indices of the underlying asset classes in which it invests, in proportion to the Fund's strategic asset allocation (SAA) weights, before fees and taxes. The Fund aims to pay distributions half-yearly. You should be aware that although the Fund aims to pay distributions, the amount of each distribution may vary, or no distribution may be payable in a distribution period.

Target Investor

This product is intended for a consumer who is seeking capital growth and potentially some income distributions. It has a high risk/return profile and is intended for use up to a standalone solution of an investment portfolio. It is likely to be consistent with the financial situation and needs of a consumer with a minimum investment timeframe of 10 years and who is unlikely to need to withdraw their money on less than one week's notice.
