¹ The managed portfolio performance represents total return for the periods. Returns have been calculated using the time-weighted method, they assume distributions are reinvested and are after investment management fees and indirect costs. Total and growth returns include accrued distributions, while income return includes paid distributions only. Returns do not take into account tax payable. Individual client returns may vary based on the contributions, withdrawals, and timing differences within the managed portfolio

² The applicable Benchmark for this portfolio is shown in the Key Information section.

Quarterly manager commentary

Market Update

Wall Street's benchmark S&P 500 Index made historic highs and delivered a strong 4.2% quarterly return in local currency terms with the exuberant optimism on AI and technology shares. European shares have delivered negative returns in local currency terms. Asian share markets have delivered solid performances. Chinese share markets have made a modest recovery (China MSCI 7% return in local currency) with hopes that increased government support can stabilise the weak property sector. Japanese share markets continue to deliver strong returns with a 1.8% gain for the quarter (Japan MSCI return in local currency).

Australian shares delivered a negative quarterly return of -1.2%. The Energy sector was the weakest performer (-6.7%) given significant declines in the key stocks of Ampol and Woodside. There was also sharp weakness in the Materials resources sector (-5.9%) as concerns over China's growth prospects undermined iron ore prices. Property securities also recorded a markedly negative return (-5.7%) given concerns over valuations and potentially 'higher for longer' interest rates. In a welcome contrast that helped mitigate the downside for Australian shares, Financial sector shares (including the banks) made very strong returns of 4% for the quarter. The Information Technology sector (2.4%) also made strong gains on AI optimism.

Australia's economy continues to display subdued economic activity with sluggish consumer spending and weak housing construction. Though the impacts are being felt unevenly across individuals, the negative impacts of high consumer prices, mortgage interest rates and rents continue to squeeze many household budgets. There is also concern that inflation is now proving sticky and stubborn with May's 4% annual increase being higher than expected. This could see the RBA maintain interest rates at current high levels for an extended period, meaning very little if any respite in cost-of-living pressures.

Portfolio Update

The Portfolio generated a slightly negative return for the June quarter. Global shares (hedged) recorded a strong 3.2% return for the past three months. However, the revival in the Australian dollar has limited global shares (unhedged) returns to a more modest 0.5% for the quarter. The best performing fund over the quarter was the Resolution Capital Global Property Securities Fund, outperforming its corresponding benchmark by 0.9%.

Portfolio changes during the quarter:

15 April 2024 - We initiated a position in Xero Ltd (XRO). XRO is a leading provider of cloud-based software and accounting services to small business. Northern Star Resources Ltd (NST) was removed from the direct equity strategy. On the back of gold price at record highs we concluded NST's valuation is too stretched.

8 May 2024 - We deployed cash resulting from recent distributions and direct ASX share dividends. Exposure to the PIMCO Global Bond Fund Wholesale was increased.

Market Outlook

We continually review the Model Portfolios to ensure they remain appropriately structured to meet their objectives and are well-positioned for the future market environment.

Maintaining growth asset exposure – Australian shares continues to have a meaningful representation in large-cap direct shares. The sharp expansion in valuation multiples, particularly in the likes of Financials, has created an element of caution as we head into the August reporting season. We maintain exposure to small- and mid-caps and see these allocations aligning with superior earnings growth and over time stronger capital growth.

Foreign currency diversification – We continue to see Emerging Market (EM) shares, and in particular China and EM Asia, as not operating on the same economic cycle as the broader Developed Market's (DM) and over a medium time horizon offer a more diversified, superior risk-reward opportunity under a range of potential market scenarios. While holding both hedged and unhedged global shares continues to be an important diversifier, we've maintained a structurally lower DM foreign currency exposure due to the increasing valuation appeal of, and constructive medium-term outlook for the terms of trade for the AUD, particularly versus the USD.

Active fixed income – We believe active management is appropriate to effectively navigate a potentially more turbulent interest rate and yield curve environment. We see actual and perceived central bank interest rate activity as continuing to drive bouts of elevated bond and credit market volatility.

Fixed income - We see favourable risk-reward attributes with longer duration Australian fixed interest (Janus Henderson) and high quality credit (Janus Henderson Diversified Credit). We consider the global credit fund (Bentham Global Income) as a 'mid risk' asset, providing a clear step down on the risk spectrum versus global equities, with a very attractive risk-reward.

Alternatives – MLC's Real Return Fund remains our preferred method of providing further diversification and versatility in downside protection via its high quality, dynamic real return attributes, particularly given the healthy allocation to genuine alternative assets.

Real Assets – we pleased to advise that the highly anticipated addition of Global Listed Infrastructure is scheduled for August 2024. A medium-term outlook of more sticky inflation, and gradually easing bond yields, support solid underlying cash flows within the Infrastructure sector, where we see valuation appeal being presented via the listed space.

3 A significant percentage of assets comprising this portfolio are only available through the managed portfolios and therefore can't be transferred out of the MyNorth Managed Portfolio Scheme. For more information relating to restrictions that may apply to asset transfers, refer to the 'Transferring assets in and out of your Portfolio' in Part 1 of the MyNorth Managed Portfolios PDS.

Important Information

NMMT Limited (ABN 42 058 835 573 AFS License 234653), is the responsible entity of MyNorth Managed Portfolios (ARSN 624 544 136) (Scheme).
