Risk Profile

Lower risk Potentially lower reward **Higher risk** Potentially higher reward

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and return, calculated using the volatility of monthly returns over five years. As it is based upon how the Fund has performed in the past, you should note that the Fund may well perform differently in the future. The risk category shown is not guaranteed and may shift over time. The higher the rank the greater the potential reward but the greater the risk of losing money. The Fund is ranked at 4 reflecting observed historical returns. The fund is in this category because it has shown moderate levels of volatility historically.

This Fund is designed for registered charities only. This document has been issued by Sarasin & Partners LLP of Juxon House, 100 St Paul's Churchyard, London, EC4M 8BU, a limited liability partnership registered in England & Wales with registered number OC329859 which is authorised and regulated by the Financial Conduct Authority with firm reference number 475111.

The investments of the fund are subject to normal market fluctuations. The value of the investments of the fund and the income from them can fall as well as rise and investors may not get back the amount originally invested. If investing in foreign currencies, the return in the investor's reference currency may increase or decrease as a result of currency fluctuations. Past performance is not a guide to future returns and may not be repeated.

There is no minimum investment period, though we would recommend that you view your investment as a medium to long term one (i.e. 5 to 10 years). Frequent political and social unrest in Emerging Markets, and the high inflation and interest rates this tends to encourage, may lead to sharp swings in foreign currency markets and stock markets. There is also an inherent risk in the smaller size of many Emerging Markets, especially since this means restricted liquidity. Further risks to bear in mind are restrictions on foreigners making currency transactions or investments. We use derivatives to increase performance and generate income, as well as for effective portfolio management: to adjust how sensitive the Sub-fund is to changes in currencies, to act on opportunities or control risk, and to gain cost-effective access to investments.
