INVESTMENT STRATEGY

The Fund seeks to achieve long-term growth through investment in the shares of global real estate companies and the global real estate investment trust markets with an overlay of sustainable criteria. The Fund invests mainly in Real Estate Investment Trusts, and company shares from around the world, which are linked to the property market. The Fund will hold mainly the shares of large or medium sized companies, but from time to time may invest in smaller companies. These companies that the Fund invests in give consideration to sustainable ecological and social issues but it will not invest in companies whose business is the management of hotels or resorts or which operates its business contrary to ecological or social standards. The Fund will not track an index. Derivatives (financial instruments whose value is linked to the expected future price movements of an underlying asset) may be used only with the aim of reducing risk or costs, or generating additional capital or income.

Performance is provided net of fees. Past performance is not a reliable guide to future performance. Performance is calculated in GBP on the basis of net asset values (NAV) and gross dividends reinvested.

Source: Sarasin & Partners LLP and FE Fundinfo. Annualised Growth Rate (AGR) is the increase or decrease in value of an investment, expressed as a percentage per year. The source for the annualised volatility measurement is FE Fundinfo and this measurement is expressed using the standard deviation of the Fund's UK GBP monthly returns over the most recent 36 month period. The yields quoted have been calculated using price information as at the date of publication. They are not guaranteed. Benchmark: S&P Developed Property Net Total Return implemented September 2011. No representative benchmark available prior to 2007. The benchmark of this fund has changed over time. Please visit www.sarasinandpartners.com/docs/global/benchmarkhistory for a full history. Prior to 28th November 2016 the fund was called Sarasin IE Real Estate Equity Global (GBP). *Accumulation Dividends are reinvested back into the fund, Income units are paid out to investors.

(Pending FSCA approval of name change) The Sarasin IE Thematic Global Real Estate Equity Fund is registered and approved under section 65 of the Collective Investment Schemes Control Act 45 of 2002.

RISK PROFILE

Lower Risk Potentially lower rewards Higher Risk Potentially higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and return. It is based upon how the Fund has performed in the past and you should note that the Fund may well perform differently in the future. The risk category shown is not guaranteed and may shift over time.

The higher the rank the greater the potential reward but the greater the risk of losing money.

The Fund is ranked at 6 reflecting observed historical returns. The fund is in this category because it has shown higher levels of volatility historically.

Derivatives risk: The use of derivatives could increase overall risk by magnifying the effect of both gains and losses in a Fund. As such, large changes in value and potentially large financial losses could result

Foreign Investment risk: Foreign securities investments may be subject to risks pertaining to overseas jurisdictions and markets, including (but not limited to) local liquidity, macroeconomic, political, tax, settlement risks and currency fluctuations.

Property risk: Investments in real estate securities can carry the same risks as investing directly in real estate itself. Real estate prices move in response to a variety of factors, including local, regional and national economic and political conditions, interest rates and tax considerations.

Currency exchange risk: Changes in the relative values of individual currencies may adversely affect the value of investments and any related income.

Geographic / Sector risk: For investments primarily concentrated in specific countries, geographical regions and/or industry sectors, their resulting value may decrease whilst portfolios more broadly invested might grow.

Liquidity risk: If there are insufficient buyers or sellers of particular investments, the result may lead to delays in trading and being able to make settlements, and/or large fluctuations in value. This may lead to larger financial losses than expected.

Equity investment risk: Value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. bankruptcy), the owners of their equity rank last in terms of any financial payment from that company.

This document is intended for retail investors. You should not act or rely on this document but should contact your professional adviser.

This document has been issued by Sarasin & Partners LLP of Juxon House, 100 St Paul's Churchyard, London, EC4M 8BU, a limited liability partnership registered in England and Wales with registered number 00329859, and which is authorised and regulated by the Financial Conduct Authority with firm reference number 475111. This document has been prepared for marketing and information purposes only and is not a solicitation, or an offer to buy or sell any security. The information on which the material is based has been obtained in good faith, from sources that we believe to be reliable, but we have not independently verified such information and we make no representation or warranty, express or implied, as to its accuracy. All expressions of opinion are subject to change without notice. This document should not be relied on for accounting, legal or tax advice, or investment recommendations. Reliance should not be placed on the views and information in this material when taking individual investment and/or strategic decisions.

The value of investments and any income derived from them can fall as well as rise and investors may not get back the amount originally invested. If investing in foreign currencies, the return in the investor's reference currency may increase or decrease as a result of currency fluctuations. Past performance is not a reliable indicator of future results and may not be repeated. Forecasts are not a reliable indicator of future performance.

There is no minimum investment period, though we would recommend that you view your investment as a medium to long term one (i.e. 5 to 10 years). Risks associated with investing in Real Estate Investment Trusts (REITs) include, but are not limited to, the following: declines in the value of real estate, risks related to general and local economic conditions, overbidding and increased competition, increases in property taxes and operating expenses, changes in zoning laws, casualty or condemnation losses, variations in rental income, changes in neighbourhood values, the appeal of properties to tenants, and increases in interest rates. In addition, REITs may be affected by changes in the value of the underlying property owned by the trusts or may be affected by the quality of credit extended. REITs are dependent upon management skills, may not be diversified and are subject to the risks of financing projects. The ability to trade REITs in the secondary market can be more limited than other stocks. The Fund may invest in derivatives for efficient portfolio management purposes. This means Derivatives can only be used to manage the Fund more efficiently in an attempt to reduce the overall risk of its investments, reduce the costs of investing or generate additional capital or income, although this may not be achieved and may create losses greater than the cost of the derivative.

The Sarasin IE Thematic Global Real Estate Equity Fund is registered and approved under Section 65 of the Collective Investment Schemes Control Act 45 of 2002. Collective Investment Schemes (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not a reliable indicator of future results. CIS are traded at the ruling price and may engage in scrip lending and borrowing. A schedule of fees, charges and maximum commissions is available on request from the Manager. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. There is no guarantee in respect of capital or returns in a portfolio. Performance has been calculated using net NAV to NAV numbers with income reinvested.

The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the Manager on request. Annualised performance shows longer term performance rescaled to a 1-year period. Annualised performance is the average return per year over the period. Actual annual figures are available to the investor on request. Highest and lowest returns for any 1 year over the period since inception have been shown. NAV is the net asset value represents the assets of a Fund less its liabilities.

The Prospectus is available from Prescient Management Company (RF) (PTY) LTD, Tel: +27 21 700 3600.
