## FUND RISK RATING

Lower risk **1** 2 3 4 5 Higher risk

We rate this fund as Risk Averse. This means it is suitable for investors looking for their money to be invested in cash funds (rather than bank accounts) but understand the value can reduce when interest rates are low, as it is possible for fund management charges to outweigh interest returns. Over the long term, it is likely that the buying power of money will be less due to the effects of inflation.
