ISIN: GB0006667470

Date of Production 26/08/2025

What is this product?

Pacific Horizon Investment Trust Plc ("The Product") is an ordinary share in a closed-ended investment trust, a company whose shares are listed on the London Stock Exchange. The Trust is actively managed and invests in a diversified portfolio of equities that are normally listed on an exchange. It aims for capital growth from investment in the Asia Pacific region (excluding Japan) and the Indian Sub-continent; it is unlikely that the Trust will provide any income. It can borrow money to invest with the intention of increasing returns (sometimes known as gearing) but in a falling market losses may be magnified. Baillie Gifford & Co Limited ("The Manager") looks to identify companies believed to offer the potential for long-term capital appreciation, irrespective of whether they comprise part of any index, typically over a 5 year horizon. It does not track its comparative index.

The Trust is suitable for all investors seeking a fund that aims to deliver capital growth over a long-term investment horizon. The investor should be prepared to bear losses. The Trust is compatible for mass market distribution. The Trust may not be suitable for investors who are concerned about short-term volatility and performance, who are seeking a regular source of income or who may be investing for less than 5 years. The Trust does not offer capital protection.

The shares are not traded directly with the Trust but are instead traded on the London Stock Exchange (directly or via an intermediary). The shares can be traded on the exchange during trading hours. The price you pay or receive, like other listed shares, is determined by supply and demand and may be at a discount or premium to the underlying net asset value of the Trust. Typically, at any given time on any given day, the price you pay for a share will be higher than the price at which you could sell it. There is no right of redemption attached to the shares and if the Trust is wound up, following a default or otherwise, shareholders will be paid any surplus assets after meeting the Trust's liabilities in proportion to their shareholdings. There is no fixed maturity date. An investor can hold their investment for any time period but 5+ years is recommended. There is no ability for Baillie Gifford & Co Limited to terminate holdings unilaterally or for the shares to be terminated automatically. Every 5 years, investors can vote to continue the Trust or wind it up (continuation vote).

What are the risks and what could I get in return?

The risk indicator assumes you keep the product for 15 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact our capacity to pay you.

The summary risk indicator only reflects historical share price volatility of the Company's shares. Gearing, exposure to emerging markets, foreign currencies, derivatives, unlisted investments and the ability of the Trust to buy back its own shares may increase risk. This product does not include any protection from future market performance so you could lose some or all of your investment.

Be aware of currency risk. You may choose to receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two countries. This risk is not considered in the indicator shown above.

This product does not include any protection from future market performance, so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment. St. James's Place International holds ring-fenced assets that match the value of your investment. This is designed to protect your investment if St. James's Place International defaults on its obligations. There is no compensation scheme for this product.

Investment performance information

The performance of the fund is dependent on the ability of the manager to identify appropriate investments, and the ability of those investments to perform in line with their objectives. Please see the funds own Key Information Document for more information.

What could affect my return positively?

The return of the fund is dependent on the ability of the manager to identify appropriate investments, and the ability of those investments to perform in line with their objectives. Please see the funds own Key Information Document for more information.

What could affect my return negatively?

The return of the fund is dependent on the ability of the manager to identify appropriate investments, and the ability of those investments to perform in line with their objectives. Please see the funds own Key Information Document for more information.

What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs. The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early withdrawal charges. The figures assume you invest £10,000. The figures are estimates and may change in the future. The actual costs will depend on the performance of the underlying investments.

Investment £10,000			
Scenarios	If you cash in after 1 year	If you cash in after 8 years	If you cash in at 15 years
Total costs	£890	£2,302	£4,192
Impact on return (RIY) per year	9.04%	2.94%	2.85%

When you invest with us, you pay us charges for our advice and charges for the products we recommend. The charges for our advice are 4.5% of the amount you invest and an annual charge of 0.5% a year. The charges for the product are up to 1.5% of the amount you invest; and an annual charge of up to 1.125% a year for the first ten years, reducing thereafter to up to 0.875%, which will in effect be waived, up to a maximum of 1% each year, for each of the first six years after your investment. If you decide to cash in all or part of an investment within six years of making it, we will take an early withdrawal charge of up to 1.625%.

The effect of the above product and advice charges combined is equivalent in total to an annual bond maintenance charge, of up to 1.625% a year for the first ten years, reducing thereafter to up to 1.375%, together with an early withdrawal charge which will apply if you withdraw your investment in the first six years on a reducing scale (6% in year one reducing to 1% in year six). This is equivalent to the advice and product charges above and not in addition to them.

In addition to the annual charges, any transaction costs and the costs of managing and maintaining the investments are charged to the fund daily, and are reflected in the prices of the fund. These costs include the fee paid to the fund manager and various other costs (such as audit fees, custody fees, VAT etc). These are also included in the total costs.

There is an administration fee of £100 each quarter, taken if the total amount invested is less than £250,000.

The table below shows the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period and the meaning of the different cost categories.

This table shows the impact on return per year of each cost category over the 15-year recommended holding period.			
One-off costs	Entry costs	0.43%	The impact of the costs you pay when entering your investment. This is the most you will pay, and you could pay less. This includes the costs of distribution of your products. This reflects our charge for advice (4.5% of the amount you invest) and our charge for the product (up to 1.5% of the amount you invest).
	Exit costs	0.01%	The impact of the costs of exiting your investment.
Ongoing costs	Portfolio transaction costs	0.00%	The impact of the costs of buying and selling underlying investments for the product.
	Other ongoing costs	2.44%	The impact of the costs that we take each year for managing your investments and providing advice. This includes our charges for ongoing advice (0.5%) and our charges for the product, as well as the costs of managing and maintaining the funds, such as fees paid to the external fund manager.
Incidental costs	Performance fees	0.00%	No performance fees are applied.
	Carried interests	0.00%	The impact of carried interests. There are no carried interests for this fund.

Other relevant information

You are responsible for the investment decisions under your Bond. St. James's Place does not provide advice on external funds held within your Bond and will not be liable for any loss arising from investment decisions you ask us to implement, whether or not we agree to implement them.

Complaints about the Trust should be sent to our Client Relations Manager at Baillie Gifford & Co Limited, Calton Square, 1 Greenside Row, Edinburgh EH1 3AN, by emailing trusenquiries@bailliegifford.com or by calling 0800 917 2112. You can also visit www.bailliegifford.com for more information

You can access additional information about the Trust, including the fact sheets, report and accounts and relevant articles, at www.bailliegifford.com. The report and accounts will include details of the Trust's management fees, administrative expenses and borrowing costs, which are the main components of the other ongoing costs disclosed in the table above.

The latest Key Fund Information Documents are available from our website at www.sjp.co.uk/kids.
