ISIN: GB00BJM02935

Date of Production 21/07/2025

What is this product?

This fund is designed to be suitable for institutional investors and professionally advised private investors. This fund may also be suitable for investors who are financially sophisticated, non-advised private investors who are capable of evaluating the risks and merits of such an investment and who have sufficient resources to bear any loss which may result from such an investment. Such investors may wish to take advice from an advisor who specialises in advising on the acquisition of shares and other securities before investing in the fund.

The Company's investment objective is to provide investors with an attractive and sustainable level of income returns, with an element of capital growth, by investing in a diversified portfolio of Renewable Energy Assets in Europe and Australia. The Company will seek to achieve its investment objective through investment in renewable energy assets in Europe and Australia, comprising (i) predominantly assets which generate electricity from renewable energy sources, with a particular focus on onshore wind farms and photovoltaic solar parks, and (ii) non-generation renewable energy related assets, in each case either already operating, in construction or construction ready ("Renewable Energy Assets"). The Company intends to invest both in a geographically and technologically diversified spread of Renewable Energy Assets and, over the long term, it is expected that investments located in the UK will represent less than 50% of Gross Asset Value and investment in each of onshore wind farms and solar PV parks will not exceed 60% of Gross Asset Value. The Company may make use of long-term structural debt to facilitate the acquisition or construction of Renewable Energy Assets to provide leverage for those specific investments. In addition, the Company may make use of short-term debt, such as a revolving credit facility, to assist with the acquisition or construction of suitable opportunities as and when they become available. The use of gearing may magnify any gains or losses.

What are the risks and what could I get in return?

The risk indicator assumes you keep the product for 15 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact our capacity to pay you.

Other material risks relevant to ordinary shares not included in the summary risk indicator include market risk, liquidity risk, counterparty risk, commodity & demand risk. Refer to the funds own KID for more detail.

Be aware of currency risk. You may choose to receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two countries. This risk is not considered in the indicator shown above.

This product does not include any protection from future market performance, so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment. St. James's Place International holds ring-fenced assets that match the value of your investment. This is designed to protect your investment if St. James's Place International defaults on its obligations. There is no compensation scheme for this product.

Investment performance information

The performance of the fund is dependent on the ability of the manager to identify appropriate investments, and the ability of those investments to perform in line with their objectives. Please see the funds own Key Information Document for more information.

What could affect my return positively?

The return of the fund is dependent on the ability of the manager to identify appropriate investments, and the ability of those investments to perform in line with their objectives. Please see the funds own Key Information Document for more information.

What could affect my return negatively?

The return of the fund is dependent on the ability of the manager to identify appropriate investments, and the ability of those investments to perform in line with their objectives. Please see the funds own Key Information Document for more information.

What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs. The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early withdrawal charges. The figures assume you invest £10,000. The figures are estimates and may change in the future. The actual costs will depend on the performance of the underlying investments.

Investment £10,000			
Scenarios	If you cash in after 1 year	If you cash in after 8 years	If you cash in at 15 years
Total costs	£385	£2,096	£2,888
Impact on return (RIY) per year	3.99%	3.87%	3.86%

When you invest, you pay a product charge and, where agreed, an initial advice charge and an ongoing advice charge. Each charge is determined and disclosed separately.

The maximum product charge each year is 0.35% of your account value, reducing on a tiered basis for larger account values. The advice charges are as agreed between you and St. James's Place Wealth Management for the advice you receive via your St. James's Place Partner.

Your personalised illustration shows the specific charges that apply to your investment.

Any transaction costs and fund charges are charged to the fund daily, and are reflected in the prices of the fund. These costs include the fee paid to the fund manager and various other costs (such as audit fees, custody fees, VAT etc). These are also included in the total costs.

There is an administration fee of £100 each quarter, taken if the total amount invested is less than £250,000.

The table below shows the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period and the meaning of the different cost categories.

This table shows the impact on return per year of each cost category over the 15-year recommended holding period.			
One-off costs	Entry costs	0.00%	The impact of the costs you pay when entering your investment. This is the charge you'll pay if you choose to invest in shares or in funds not offered by St. James's Place.
	Exit costs	0.00%	The impact of the costs of exiting your investment.
Ongoing costs	Portfolio transaction costs	0.50%	The impact of the costs of buying and selling underlying investments for the product.
	Other ongoing costs	3.39%	The impact of the costs that we take each year for managing your investments and providing advice. This includes our charges for ongoing advice (0.8%) and our charge for the product, as well as the fund charge.
Incidental costs	Performance fees	N/A	No performance fees are applied.
	Carried interests	N/A	The impact of carried interests. There are no carried interests for this fund.
