If not practicable then reporting within 10 business days following end of quarter

All distributors	Significant dealing outside the target market, under s994F(6) of the Act.	As soon as practicable but no later than 10 business days after distributor becomes aware of the significant dealing.

### Significant dealings

Section 994F(6) of the Act requires distributors to notify the issuer if they become aware of a significant dealing in the product that is not consistent with the TMD. Neither the Act nor ASIC defines when a dealing is 'significant' and distributors have discretion to apply its ordinary meaning. The issuer will rely on notifications of significant dealings to monitor and review the product, this TMD, and its distribution strategy, and to meet its own obligation to report significant dealings to ASIC. Dealings outside this TMD may be significant because:

- they represent a material proportion of the overall distribution conduct carried out by the distributor in relation to the product, or
- they constitute an individual transaction which has resulted in, or will or is likely to result in, significant detriment to the consumer (or class of consumer). In each case, the distributor should have regard to:
  - the nature and risk profile of the product (which may be indicated by the product's risk rating or withdrawal timeframes),
  - the actual or potential harm to a consumer (which may be indicated by the value of the consumer's investment, their intended product use or their ability to bear loss), and
  - the nature and extent of the inconsistency of distribution with the TMD (which may be indicated by the number of red or amber ratings attributed to the consumer). Objectively, a distributor may consider a dealing (or group of dealings) outside the TMD to be significant if:
    - it constitutes more than half of the distributor's total retail product distribution conduct in relation to the product over the reporting period,
    - the consumer's intended product use is Solution / Standalone, or
    - the consumer's intended product use is Core component and the consumer's risk (ability to bear loss) and return profile is Low.
